Leadership crisis is evident in public and private sector in different parts of the world. This leadership has been criticized and charged for commercial and ethical failures. In recent time, modernization of leadership started and it places strong emphasis on values and ethics. Value-Based Leadership disjunction appeared and it put the importance on ethics and values in leadership. Through many leadership failures in America and Europe and then search for leaders who care for ethics and positive values in the organisation showed the importance of values for successful management in the organisation. Islamic leadership is a value based leadership. As a set of ethical rules, Islamic leadership is an excellent model of leadership for a successful organisation. In this research we are going to use content analysis. In a comparison to a conventional leadership Islamic leadership promises higher success and benefit for the organisation and its members.
